### Shareholders Enquires and the Answers:

- Why was there no dividends distributed even though the loss was lower than last year, as we had hoped there would be a dividend for this year?

The company hopes that it will be continuously distributing profits, but the situation and changes in the global economic environment, and the continuing competition in the local and export markets in addition to the significant damages to the cement industry as a result of continuous dumping and increased supply on demand, and the high cost, especially the cost of import fuel, which It negatively affected the results of the company, even though the company has made great efforts to guarantee the entire marketing.
